DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Antecedent basis should be provided for the surfaces of the first and second bristle supports being capable of lying in substantially the same plane during operation of the electric toothbrush.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent 10-66704.

The Japanese patent discloses the invention, a powered toothbrush, as is claimed (figs. 15-18). The Japanese patent discloses a handle (3) with a neck (10) extending therefrom and supporting a head at a distal end thereof. The head has an exposed outer surface from which bristles (2) extend. A first tuft block (13) is rotatably mounted to a fixed section (11) of the head for oscillating rotating movement (see arrow in fig.16). A first drive structure (18,21) is connected to the first tuft block for

Art Unit: 1744

moving the first tuft block in a plane generally parallel to the exposed outer surface. A second tuft block (12) is mounted within the fixed section of the head and is aligned and received in an opening in the exposed outer surface. The second tuft block (12) has bristles (2) extending outwardly from the exposed outer surface. The second tuft block is mounted for moving in an in and out direction generally perpendicular (see arrow in fig.17) to the exposed outer surface within said opening. A second drive structure (16) drives the second tuft block in the in and out direction.

Interference

Claims 8-12 of this application has been copied by the applicant from U. S. Patent No. 6,889,401. These claims are not patentable to the applicant because of the above set forth 102 rejection.

An interference cannot be initiated since a prerequisite for interference under 37 CFR 1.606 is that the claim be patentable to the applicant subject to a judgment in the interference. The claims are clearly met by the Japanese patent.

Response to Arguments

Applicant's arguments with respect to the objection to the specification are noted. While applicant points to the figures as providing support for the claimed subject matter, it is the lack of antecedent basis for the claimed terminology that is the basis of the objection. Antecedent basis should be provided for the surfaces of the first and second bristle supports being capable of lying in

Art Unit: 1744

substantially the same plane during operation of the electric toothbrush. The description of the figures 4-7 embodiment, pointed out by applicant, does not discuss the surfaces as claimed.

Applicant's arguments, filed 25 July 2005, with respect to the rejection of claims 1, 2, 4, 6 and 7 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Allowable Subject Matter

Claims 1, 2, 4, 6 and 7 allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
